RARITAN BAY MEDICAL CENTER

OLDBRIDGE, NEW JERSEY

Building Size: 9,800 square feet

Building Start: June 2001

Building Complete: October 2001

PROJECT PROFILE

Health Care

Project Profile # N05027

This addition was built off site completely as a 2 story structure to ensure perfect fit and alignment of all modules.

PROJECT OVERVIEW:

When a hospital in New Jersey had to expand their Emergency Patient Care Department, they looked to modular construction for the time sensitivity and reduced site disruption it offers. This two story addition was built off site with all features and finishes preinstalled, shipped in 22 sections and erected adjacent to the 4 story hospital facility. The first floor provides a Registration and Waiting Area, fast track and holding patient care areas with Nurse's station, X-ray reading, utility rooms and bathrooms as well as several offices. The second floor is open space, earmarked for future office expansion.
