SOMERSET COUNTY DETENTION CENTER SOMERSET COUNTY, MD

Building Size: 5,346 square feet
Building Start: November, 2007
Building Complete: March, 2008

PROJECT PROFILE

Institutional
Project: #2075006

NRB's 5000 Series steel and concrete design technology provided the structural integrity and performance required for this center in a shorter timeframe than conventional construction.

PROJECT OVERVIEW:

When the Somerset County needed more detention space for their work release program and within a short timeframe, they turned to modular construction as an alternative method of constructing a permanent detention center within their time requirements.

Using NRB's steel and concrete construction design, the new center was designed to complement the existing facility; steel siding and trim were chosen to blend with the existing brick structure and windows were custom fabricated to match the existing windows.

FEATURES & BENEFITS:

- NRB's 5000 Series steel and concrete design technology provided the structural integrity and permanence required for this center in a shorter timeframe than conventional construction.
- Interior features include stainless steel detention grade plumbing fixtures, epoxy coated floors, walls and ceilings in the shower area.
- To achieve the higher level security requested by the owner level 4 bullet resistant glazing wall installed at the guard station, maximum security door hardware was installed, expanded mesh steel was installed under vandal proof walls.
- A customized detention grade ceiling was incorporated in the building design and the modular mate line finish was adapted on-site.
