

NRB

modular building specialists

WESTLAND MIDDLE SCHOOL BETHESDA, MD

Building Size: 9,672 square feet
Building Start: March, 2008
Building Complete: June, 2008

PROJECT PROFILE

Educational
Project: #2075007

The location of this school addition was in the courtyard of the existing school making access extremely difficult, so site building was not an option. NRB provided the solution with our 5000 series permanent modular construction.

PROJECT OVERVIEW:

The modular addition had to meet the existing school at two different floor elevations and had to fit between the two existing wings with a tolerance of only one inch. Site-built construction proved to be impractical.

This two-story modular addition is comprised of 14 modules of varying sizes which fit precisely between two wings of the existing school in an enclosed courtyard. Modules and site materials were craned into the courtyard using a 550-ton crane. The building contained three classrooms per floor and an open sided stairwell.

FEATURES & BENEFITS:

- Classrooms were completed with custom laminated casework, white-boards and tack-boards, projector screens, and unit ventilators.
- The interior is finished with painted drywall and vinyl tile.
- The exterior is full face brick finished on site to match the existing school building.
- The three-sided stair module contained a concrete filled steel stair system with a cantilevered landing to allow the existing brick of the school to be used as an interior accent wall.
