

PIONEER PETROLEUMS
Minden, Ontario

DETAILS

30' x 46'
1380 SF
10 weeks NRB yard construction time
10 days on site

PROJECT SUMMARY

Steel and concrete structure with NRB's own FP1 aluminum cladding system, creates a clean line low maintenance building exterior. This panel system can pre-installed in our construction yard leaving only minor site finishing.

The store interior finishes consist of ceramic floors, acoustic ceiling tiles, pay point and country style mill and perimeter fluorescent accent lighting to enhance sales floor. Floor layout allows for optimal sales space usage and maximum storage.

All interior architectural features and finishes were completed before shipping, to minimize site installation.

STORE LAYOUT AND FINISHES PERCEIVE PIONEERS CORPORATE IMAGE
