modular building systems

## Innovative Space Solutions Medical/Health Care Project Summary #N15036

### **Presgar Imaging Clinic Orlando, Florida**

**Size:** 60'0" x 63'0"  
**Began Production:** Nov 14, 2001  
**Shipped to Site:** Jan. 28, 2002

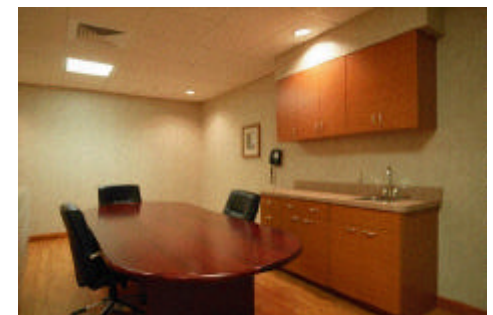

#### **Project Information**

The owner of this 3780 square foot MRI facility wanted a building that was custom built to their unique needs and time frame. Modular construction addressed both of his concerns.

While the building was being constructed off site at NRB's manufacturing facility, all site services were simultaneously being completed at the job site. In just 49 days after drawing approval by the customer, the steel framed modules with pre-poured concrete floors were shipped to the site and assembled onto the already in place foundations.

To further extend NRB's involvement in this project, the Owner requested that NRB supervise the installation of the building on site and advise the Site Contractor of proper procedures and finishes.

The end result was a very satisfied customer.

*Another quality facility built by NRB for Modular Solutions, LLC, Carmel, IN*
