RED ARROW BUS TERMINAL

Calgary, AB

Building Size: 1,200 sq. ft.

Building Start: December, 2008

Building Complete: March, 2009

PROJECT PROFILE

Retail / Hospitality

Project Profile # 1085013

Careful consideration was given to all exterior and interior finishes at split line locations for the ability to relocate in the future, but at the same time maintaining an architectural appeal.

PROJECT OVERVIEW:

This modular building was a first for the bus line, and was chosen because of site conditions, and the capability of future relocation. The steel and concrete building was set on a pinned foundation, and was divided into 3 very practical sized sections. Bright bold colours and materials were used to achieve a appealing yet practical waiting area, with lots of windows for natural light.

FEATURES & BENEFITS:

- Pre-poured concrete floors and a structural steel frame allowed the building to achieve the performance of a permanent structure yet allows relocation if required
- Exterior finishes consist of flat pre-painted aluminum panels, horizontal ribbed siding, and site installed cultured stone – canopy was pre-installed in factory, then removed for shipping to ensure for perfect fit and finish on site
- Interior finishes are bold and bright; dark ceramic floors and carpet, brightly painted gypsum walls, large clear glass windows and vestibule, and interior use of cultured stone accent
- Washroom fixtures are bold and classic and clean
- Customer service desk was custom built on same angle as entrance and was pre-installed in factory with matching bulkhead and lighting above.
