

Hendrickson Spring
Stratford, ON

Size: 12' x 20' Two storey Inplant Office
Drawing Approval Date: May 20
Completion Date: June 12

Project Description:

Within 17 business days after this client approved their drawings, this Inplant office was installed and ready to be occupied.

Due to the location of this office, on top of an already existing steel mezzanine, NRB shipped the material in knockdown condition and assembly took place entirely on site.

This office was equipped with a "Soundstop" Package on the roof and all walls for a much quieter working environment within the busy plant. This inplant office also came equipped with an independent sprinkler system.
